

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. HUNGARIAN LANGUAGE GUIDE

Hungarian is spoken by about 13 million people in Hungary and the adjoining sections of Rumania and Yugoslavia. This Language Guide will enable you to ask directions, buy things or order a meal in these regions.

How to Use the Records and Guide

This Guide is not intended to give you a complete command of Hungarian. For a thorough course write to the United States Armed Forces Institute, Madison, Wisconsin. This handbook will, however, enable you to carry on simple conversations in the language.

The records that go with this Guide give you a number of the most important words and phrases in Hungarian. Read the section called Hints on Pronunciation and then listen to the records until you know the Useful Words and Phrases by heart. *Repeat each word out loud right after you hear it and say it exactly the way the Hungarian speaker does.* Imitate the pronunciation as closely as you can, just as you might mimic someone who has an unusual accent.

Try to get every detail of the pronunciation, even the rhythm and intonation. Follow the words in your Guide but use them only as a reminder, if you hear something different from what you see written, go by what you hear. *Remember that you can't get the sound of a language from the printed word alone—you have to use your ears even more than your eyes.* If you don't have the records and can't get a Hungarian speaker to read the words, you will have to rely on the Hints on Pronunciation alone.

By the time you have practiced the Useful Words and Phrases several times, you will know what sound each letter stands for in the Guide. You will then be able to pronounce the Additional Expressions even though you have not actually heard them, and you will be able to form sentences of your own by using the section called Fill-in Sentences.

Hints on Pronunciation

All the words and phrases are written in a spelling which you read like English. Each letter or combination of letters is used for the sound it normally represents in English and it *always* stands for the same sound. Thus, "oo" is always to be read as in *too*, *boot*, *tooth*, *roost*, never as anything else. Say these words and then pronounce the vowel sound by itself. That is the sound you must use every time you see "oo" in the Pronunciation column. If you should use some other sound—for example, the one in *blood* or the one in *door*—you might be misunderstood.

Syllables that are accented—that is, pronounced louder than others—are written in capital letters. Hungarian words are always accented on the first syllable. *Curved lines () are used to show sounds that are pronounced together without any break; for example, "N_YOALTS" meaning "eight."*

The words are
written in a simplified
spelling, like this...

BUTTE.... B_YOOT
PHOENIX.... FEE-niks
PHILADELPHIA...fil-a-DELf-ya
POUGHKEEPSIE...po-KIP-see
SIOUX CITY...SOO-SIT-ee
WORCESTER...WOOST-ur
SCHENECTADY- ska-NEKT-a-dee

the SYL-la-bles
that are pro-NOUNCED
LOUD-er are in
CAP-it-al LET-ters

SPECIAL POINTS

Here are a few points to note as you listen to the records:

EE

when underlined, stands for a sound like the *ee* in *bee*, *meet*, *seem*, except that you round your lips as you say it. Example: "VAWR-ro-tee" meaning "needle."

I

when underlined, as in *hit*, *miss*, *tin*, but said with the lips rounded. Example: "KEH-ril" meaning "it costs."

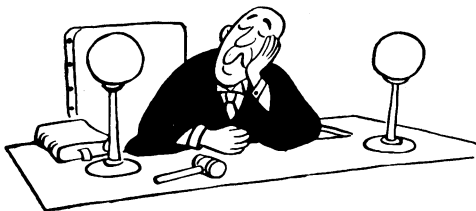

ER

when underlined, as in *her*, *fern*, *mercy*, but said with the lips rounded. Example: "VEN-dayg-ler" meaning "restaurant."

E or EH

as in *met*, *men*, *bell*. Example: "ID-eh" meaning "here."

DJ as in JUDGE

Q or QA

with a dot underneath, as in *go*, *boat*, *soap*, except that it is very short. Example: "HQAL" meaning "where."

DJ

stands for a sound something like the one in *judge*, *George*, *joke*. Listen for it on the record. Example: "EDJ" meaning "one."

N

when underlined, stands for an "n" sound combined with a "y" sound. Example: "HAHNN" meaning "how much" or "how many."

USEFUL WORDS AND PHRASES

The following is the exact wording of the Hungarian language records issued with this Guide:

These records give you a few useful phrases in Hungarian. To learn to say these phrases so that you will be understood, imitate the sounds exactly as you hear them. You will hear the English first, followed by the Hungarian; then repeat the Hungarian out loud, and say it *good and loud*. Remember! Repeat every Hungarian phrase right after you hear it.

In the Hungarian Language Guide which should be used with these records, all the phrases you will hear are written in a simplified spelling which you read like English.

Listen to the records six or seven times and you will know the phrases by heart.

ALPHABETICAL WORD LIST

In Hungarian the form of a word often changes according to the way it is used in a sentence. For example, the simple form of the word for "water"—"VEEZ"—is always used in a sentence like "The water is cold." However, in a sentence like "I would like some water," the word is changed to "VIZ-et" and you say "SEH-ret-nayk VIZ-et." The simple form is given in the list below. For the correct form to use in sentences like "I would like __," "Give me __," etc., see pages 33 to 44.
